

Version 7 Support Upgrades to WIN-911 Standard & WIN-911 Interactive

For Part Numbers: WIN-911/B2S & WIN-911/P2I

Who is eligible?

- Customers who have previously purchased a WIN-911 Version 7 software package.
- Customers current on their Software Maintenance and Support Agreement.

What do you need to know before deciding to upgrade?

- If you maintain support with your Version 7 product, you will be able to take advantage of this upgrade at any time.
- Some features of WIN-911 Version 7 are not yet supported or will not be supported in the Standard, Interactive and Advanced product lines. Please see matrix below and refer to the [WIN-911 Standard, Interactive, Advanced System Requirements](#) for more detail.

Features not supported in WIN-911 Standard, Interactive and Advanced

Direct Connects	Notifiers	Add-ons	OS
FactoryTalk View HMI Tag Server	<u>Dialogic</u> Voice Calls	WEB-911 XTools	32-bit OS
FactoryTalk View ME (PanelView)	Local Announcer		Windows XP
DDE	Alphanumeric Paging		Server 2003
	Numeric Paging		
	Printing		

- A WIN-911 Version 7 Conversion Utility is available to help facilitate the migration of data. To learn more about this utility, please refer to [WIN-911 V7 Importer](#) webpage.
- Software Maintenance & Support pricing for WIN-911/Standard, Interactive and Advanced will be based on 20% of the total software list price.

How to request the upgrade?

- A new Serial Number as well as a new Software Maintenance and Support Number will need to be generated for upgrade. If the customer is current on support please contact sales either by phone or email. You will be asked to provide us the customers WIN-911 V7 CD Tracking number to identify the system we are upgrading.

- If the customer would like to move up to a higher tiered package then the one provided in the V7 Support Upgrade, one of these part numbers will need to be provided in the form of a purchase order.
